

Rochester Association for the Education of Young  
Children  
Is pleased to present

***BOYS: Brains and Behavior***

A Mini Series...Exploring the “Whys” with Facts, Figures and Fun

The male brain functions differently from the female brain and both learn in varying ways. During this program participants will learn how and why a boy’s brain functions the way that it does and how to apply this knowledge to your classroom work. Nancy Stanton Multer will provide us with thought-provoking ideas about what engage and disengage young boys and how this motivates their behavior. Nancy is currently a consultant at the Toy Resource Center. In addition, she is a senior consultant and teaching artist with Wolf Trap Early Learning through the Arts at Nazareth College and a storyteller. She has a great deal of experience as an early childhood specialist, art educator, preschool program mentor, parent educator and art educator. This will be the first of three programs in the series and you won’t want to miss it!

Wednesday October 17<sup>th</sup>  
4:00-6:00 P.M.

Brighton Parent Resource Center  
2035 Monroe Ave., Rochester

Participants will receive 2 training hours toward NYS licensing requirements.
